14	8	22	29	0

PUI are Persons Under Investigation for COVID-19

New Geographic Data Displays

In addition to daily COVID-19 counts for the tri-county area, new Geographic Information System (GIS) maps for Peoria County now display a dashboard for a visual explanation of local community spread. Individuals can discover the new interactive maps and graphs on the Peoria City/County Health Department website at www.pcchd.org/COVID19.

Rooted in the science of geography, GIS integrates data with location to provide maps and data in a visual way. GIS maps of daily data point statistics for COVID-19 in Peoria County include:

- Total confirmed cases in Peoria County.
- Number and percentage of reported positive and negative test results.
- Confirmed cases to date and daily growth of reported number of confirmed cases.
- GIS map of number of tests by zip code and cases by zip code.
- Additional graph view of number of tests administered by zip code.
- Number of reported tests and cases by gender, race, and age group.

While the GIS Dashboard will be updated throughout the week, please note that depending on the time of day the daily count numbers are released, those numbers may not align with the time of day numbers are updated or represented in the dashboard.

Local health departments throughout Illinois and the U.S. continue to provide disease surveillance activities for COVID-19 to assure the care and safety of our residents as our highest priority.
