Currently, IDPH is reporting a total of 257,788 cases, including 8,273 deaths, in 102 counties in Illinois. The age of cases ranges from younger than one to older than 100 years. The preliminary seven-day statewide positivity for cases as a percent of total test from September 4 – September 10 is 3.9%. Within the past 24 hours, laboratories have reported 56,661 specimens for a total of 4,632,382. As of last night, 1,619 people in Illinois were reported to be in the hospital with COVID-19. Of those, 359 patients were in the ICU and 155 patients with COVID-19 were on ventilators.

Following guidance from the Centers for Disease Control and Prevention, IDPH is now reporting separately both confirmed and probable cases and deaths on its [website](#). Reporting probable cases will help show the potential burden of COVID-19 illness and efficacy of population-based non-pharmaceutical interventions. IDPH will update these data once a week.
